STATOTHR

Dear 

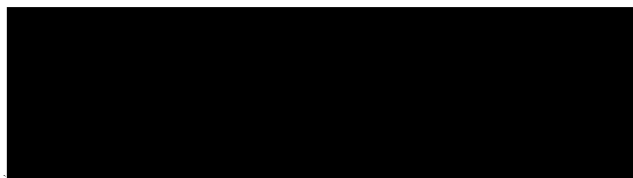

A ginned-up copy of the 1969 publication you asked about that treats the weather and climate of Syria, Jordan, Lebanon, and Israel is on its way to you by separate mail. The publication is unclassified, but in its formal dress it carries the control "Official Use Only." This control is necessitated by the fact that some content may be protected by copyright.

You are free to retain and use these data in your research, but you should not reference the publication or its parent government program in any writings or lectures.

Hope your work continues to go well.

Sincerely,

STATINTL

Deputy Director
Basic and Geographic Intelligence
